SUBJECT	Never miss another website lead
MESSAGE	Hi there, You're reading this because I just filled in your contact form. Imagine I'm a customer: how long before you call me? An MIT study found that calling a new lead within 5 minutes rather than 30 makes you 100 times more likely to connect with them. That's exactly the call we make for you. When a lead leaves their number on your website, we call them in about 30 seconds, and you pick who they talk to: 1. You or your staff. We ring your phone and connect you while they're still on your site. Miss it? Our AI takes the call. 2. Our AI voice agent. It answers their questions, qualifies them and books the appointment, around the clock, then sends you a full transcript. Hear it for yourself: visit https://firstleadgen.com, tap the blue phone icon in the bottom corner and enter your number. It will call you. The demo is the AI option. No card is needed on our Basic plan. A real person helps you get set up. The first 14 days are free. Best, Alvaro, First Lead Gen Not a fit?
